

DEFINITION OF “IMMEDIATELY AVAILABLE” WHEN MEDICALLY DIRECTING

Committee of Origin: Economics
(Approved by the ASA House of Delegates on October 17, 2012)

A medically directing anesthesiologist is immediately available if s/he is in physical proximity that allows the anesthesiologist to return to re-establish direct contact with the patient to meet medical needs and address any urgent or emergent clinical problems. These responsibilities may also be met through coordination among anesthesiologists of the same group or department.

Differences in the design and size of various facilities and demands of the particular surgical procedures make it impossible to define a specific time or distance for physical proximity.
