

Qualified Registries for the 2010 PQRI and Electronic Prescribing Incentive Programs

CMS is pleased to announce the registries that have become “qualified” to submit quality data to CMS on behalf of their eligible professionals for 2010 PQRI reporting (see table below). Each of these registries has gone through a thorough vetting process including checking their capability to provide the required PQRI data elements, reviewing a measure flow (this checks to see whether the registry calculates the measure’s reporting and performance rates correctly), and transmitting the required information in the requested file format (XML). Some registries are also capable of reporting the electronic prescribing measure to CMS as listed in the table below. While the listed registries successfully completed the vetting process, CMS cannot guarantee that any or all of the listed registries will be successful in providing the required information on behalf of their eligible professionals for the possible payment incentive.

Eligible professionals who wish to participate in 2010 PQRI using one of the registry-based options may contact the registries listed below for additional details on participation options.
